

Name: _____ Per _____

Group Members Names:

Chemical Families

Directions: With your family research your group of elements on the periodic table.

- Fill out the section of the table for your chemical family.
- At the end of the period each group will share and get information about the other chemical families
- Create a collage of information, pictures, drawings, etc. that is representative of the information that you found about your chemical family. In your collage you must include the following:
 - Title of your chemical Family
 - The elements that make up your Chemical Family
 - The ions that are formed
 - The properties of your chemical family
 - A fun, unique or interesting fact
 - Pictures/drawings/symbols representing your chemical family- you will be graded on color and neatness.

You will present this information to the class, so please make your information LARGE!

Chemical Family	Elements	Ion (s) Formed	Properties	Unique, Fun, or Interesting Fact
